PROFILE

Industrial Engineering student and co-founder with hands-on experience in data analysis, data modelling and digital transformation of business operations. I design and build data-driven B2B platforms and ERP-style systems — covering order management, inventory, pricing, accounts and profitability analytics — using Python, SQL, Supabase (PostgreSQL), Next.js and TypeScript. Microsoft-certified Power BI Data Analyst (PL-300) with certificate training in Big Data & Business Analytics. I analyse fragmented, manual processes, model the underlying data and workflows, and turn them into measurable, scalable digital systems. Seeking to grow toward data architecture and data platform engineering within an experienced team.

CORE TECHNICAL SKILLS

Data & Analytics: Power BI (PL-300 certified), SQL, Python, data modelling, reporting & dashboarding, process/data analysis
Databases & Platforms: Supabase (PostgreSQL), relational data design, role-based access control, B2B portal & ERP workflows
Development: Next.js, TypeScript, REST-style integrations, Microsoft Excel (advanced), Microsoft Office
Methods: process analysis & improvement, operations planning, digital transformation, project & team coordination

EXPERIENCE

Co-Founder — Perdeno (2025 - Present)

- Co-founded a startup building ERP and AI-supported digital solutions for the curtain and home-textile industry.
- Designed the data model and workflows for order management, inventory tracking, customer accounts, cost calculation and profitability analytics, digitalising previously manual processes.
- Develop user-focused web applications on Next.js, TypeScript and Supabase (PostgreSQL), including role-based data access.
- Lead pilot-user programmes, product development, business-model design and customer discovery interviews.

Sales Operations Assistant — Kayı Perde (2022 - Present)

- Work across ordering, pricing, customer tracking and after-sales operations; support inventory control and sales-tracking data.
- Take an active role in the company's digitalisation and process-improvement initiatives, identifying data and reporting needs.

INTERNSHIPS

Planning & IT Department Intern — Hassan Dekor (2026)

- Support the analysis and improvement of operational processes across the planning and information-technology units.
- Help define digitalisation requirements for dealer, order, inventory and sales data flows.
- Contribute to planning the workflows, user requirements and role-based authorisation structure of a B2B dealer portal and management system.
- Assist in developing and testing Next.js/Supabase-based systems, plus reporting, data organisation and cross-team coordination.

Intern — Moral Tekstil (2025)

- Worked in sales operations, dealer communication and order processes; organised and reported sales data and supported operational tracking.

LEADERSHIP & ACTIVITIES

Vice President — Istanbul Medipol University Operations Research Society (2025 - 2026)

- Plan club activities and coordinate teams; run initiatives supporting students in operations research and data analysis.

Event Team Manager — Operations Research Society (2025)

- Managed event planning, team allocation, task tracking and operational coordination, gaining time and resource-planning experience.

EDUCATION

B.Sc. Industrial Engineering

Istanbul Medipol University (2022 - present)

Associate Degree, Business Administration

Anadolu University (2023 - present)

LANGUAGES

English — B2 (Upper-Intermediate) • German — A1 • Turkish — Native

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300) — Microsoft

Big Data & Business Analytics Specialisation — ITU SEM

Project Management Specialisation — Yıldız Technical University SEM

REFERENCE
